Figure 1 shows various map symbols and their corresponding text labels. The symbols are arranged in a grid-like fashion. The first column contains symbols for Highway, Secondary Road, Jeep Trail/Walkway/Path, and Railroad. The second column contains symbols for Pipe/Power Line, Ridge/Physical Feature, Property/Fence Line, and Nonvisible Boundary. The third column contains symbols for Stream/Shoreline, Intermittent Stream, River / Lake, and Glacier. The fourth column contains text labels for Modality, Inset, and Out Area.

Where international, state, and/or county boundaries coincide, the map shows

¹ A '*' following a place name indicates that the place is coextensive with a MCD. A '^' indicates that the place is also a false MCD; the false MCD name is not shown.

2 This map shows tribal census tract boundaries and numbers within the subject entity; nontribal census tract boundaries are shown outside of the subject entity but without numbers. A tribal census tract is a type of census tract defined within a federally recognized American Indian reservation or off-reservation trust land area for the purpose of the census, based on an American Indian hierarchy rather than by state and county. Where reservation or off-reservation trust lands cross state or county boundaries, the same tribal census tract number may be assigned on both sides of the boundary, and, if so, constitutes a single tribal census tract entity.

³ A '*' following a block number indicates that the block number is repeated elsewhere in the block.

All legal boundaries and names are as of January 1, 2000. The boundaries shown on this map are for Census Bureau statistical data collection and tabulation purposes only; their depiction and designation for statistical purposes does not constitute a determination of jurisdictional authority or rights of ownership or entitlement.
